LED Step & Stair Lighting

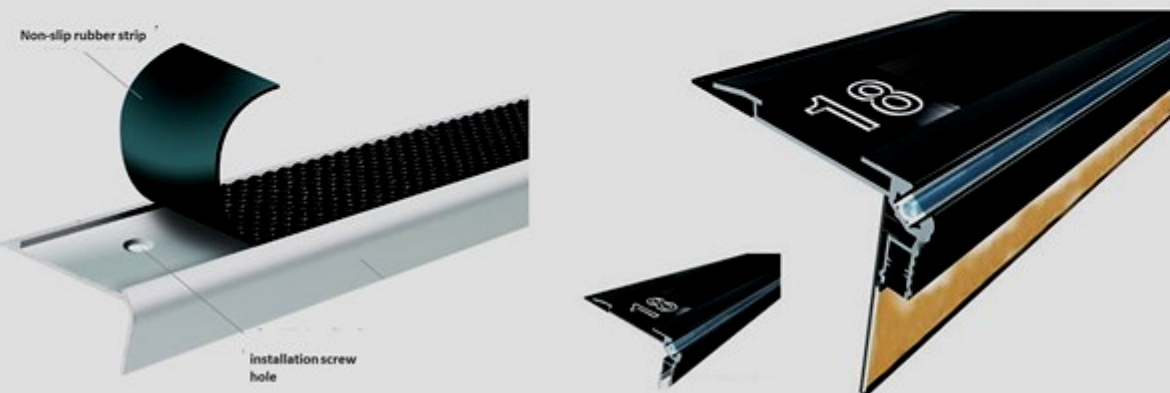

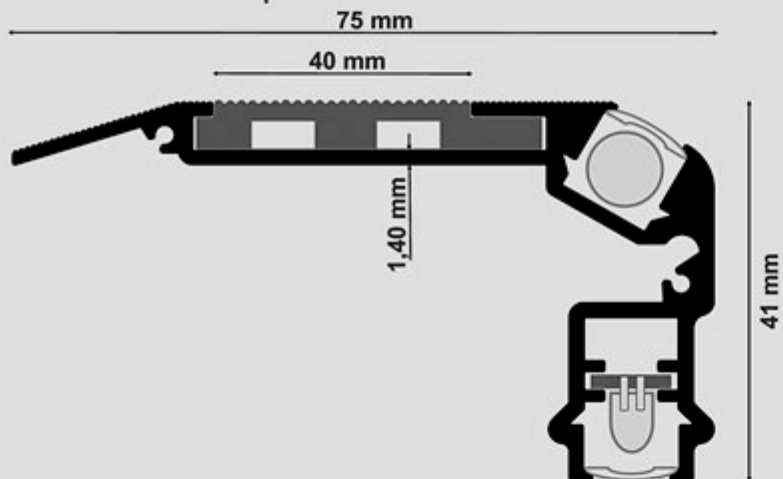

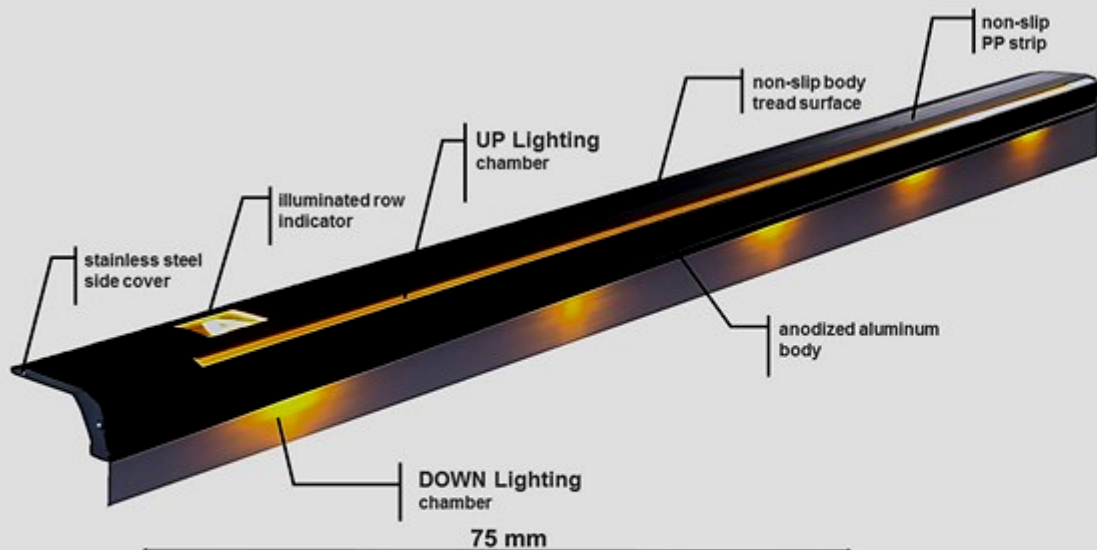

SEGASit offers LED stair lighting solutions with wide range of models and versions to meet staircase lighting requirements of cinema, auditorium, conference and theater halls.

The Cinema and Theater Series LED Step Lighting is an aluminum stair profile with single color LED. Perfect for theater applications this profile also offers optional lighted aisle marker with a number, letter or symbol.

SEGASit LED stair lighting are designed not only to illuminate your stairs but also to make it safe.

The LED step lighting system that provides a continuous linear lighting effect is ideal for theater step lighting and Emergency Safe Path Way Lighting.

We offer a wide range of LED aisle lighting solutions for your staircase lighting requirements.

LIGHTING SYSTEM

The whole system operates by 12V DC, making the whole system extra safe. Instant start, No flicker, No noise, Low work temperature, Low power consumption.

Various single colors of LED can be used and can be color selected to your choice of RED-BLUE-COLD WHITE-WARM WHITE-GREEN-AMBER.

UP-LIGHTING System is a LED lighting that provides a continuous linear lighting effect.

The illumination is provided by a total of 2 pcs 5mm LED bulb lights located on the left and right head of the lighting chamber. For energy saving, each LED bulb light used in the system is 18mA, total 36mA. Lateral LED bulb light sources are enclosed with polycarbonate black color cover to be invisible.

The illumination from lateral light sources are carried along in the lighting chamber as a continuous and homogeneous line by a special solid core fibre optic rod.

Don't need to dimmer the lighting system. Thanks to the system is not lighting the outside, the illumination can be seen only from eyes of spectators.

DOWN-LIGHTING with 2 options of lighting system

- ♦ **Pinpoint Effect:** is provided by 15-20° narrow angle single color 18mA LED bulbs that placed at certain intervals in DOWN lighting chamber.
- ♦ **Continuous Effect:** is provided by Strip LED that placed in DOWN lighting chamber.

Illuminated ROW indicator is perfect for theater applications this profile also offers optional lighted aisle marker with a number, letter or symbol.

BODY

The body is made of meat thickness 1,40 mm anodized aluminum profile for use with 90° step angles-eliminates problem of rusting. Standard anodizing color is BLACK.

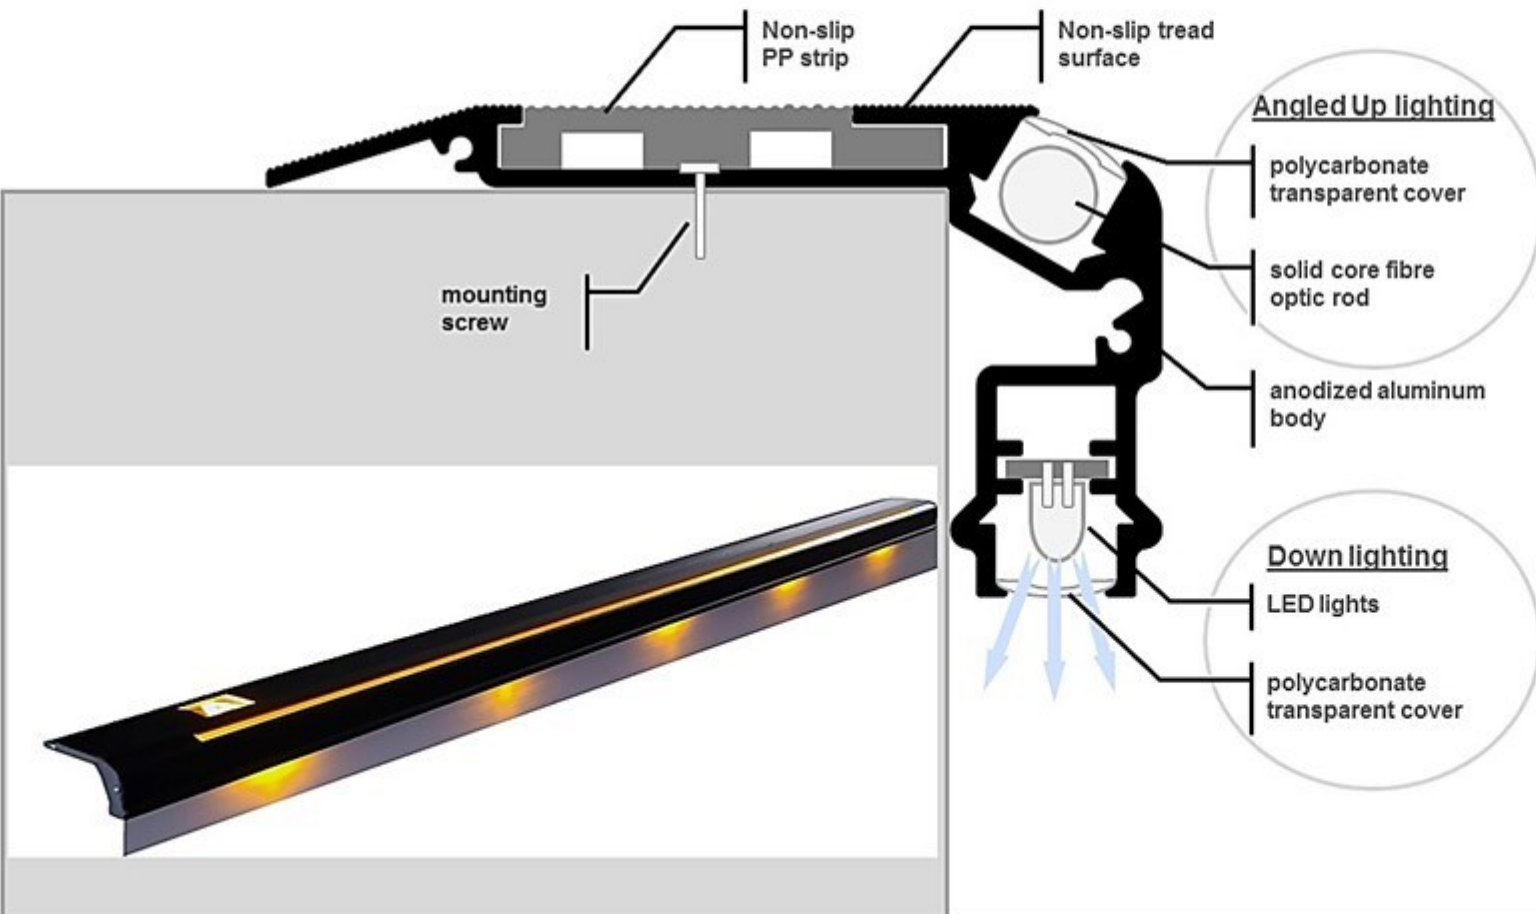

The whole treading surface is designed with claws and equipped with a non-slip 40mm wide plastic strip to prevent foot slipping.

Both sides of the body are enclosed with stainless metal covers.

All illumination chambers are enclosed with polycarbonate transparent covers.
